

TAUFIK RAHMAN TANJUNG

Front-End Developer — React · TypeScript · Tailwind CSS · REST API Integration

taufiksibolga1@gmail.com | +62 822-8766-5564 | Bandung, West Java, Indonesia | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)
4 web applications shipped · responsive, interactive UIs · React · TypeScript · Tailwind CSS · REST API integration

PROFESSIONAL SUMMARY

Front-end developer and D3 Informatics Management student with experience as a Programming Training Instructor and Academic Intern at Universitas Nasional PASIM Bandung. Experienced in building web applications with React, JavaScript, HTML and CSS, focused on crafting responsive, interactive and user-friendly interfaces. Comfortable with RESTful API integration, reusable components, and state management in web application development. Analytical, a strong communicator, detail-oriented, and highly motivated to learn and grow as a Front-End Developer.

TECHNICAL SKILLS

Core — JavaScript, TypeScript, SQL, HTML5 & CSS3, React, React Router, Node.js, Express.js, Tailwind CSS, MySQL, PostgreSQL, Git & GitHub, RESTful API Design, JWT Authentication

Applied in the projects below: Spring Boot, Spring Cloud Gateway, Spring Security, Vite, Supabase (PostgreSQL & Realtime), Docker & Docker Compose, Microservices Architecture, API Gateway, Role-Based Access Control (RBAC), Payment Gateway Integration, Brevo SMTP

Working familiarity: C, Java, XAMPP, Vercel, Railway, Render, Object-Oriented Programming (OOP), Agile/Git Workflow, Containerization

Soft Skills: Team Collaboration & Leadership, Problem Solving, Effective Communication, Time Management, Adaptability & Continuous Learning

Spoken Languages: Indonesian (native) · English (technical reading & writing)

FEATURED PROJECTS

SIASEK — *Integrated Academic Management Platform (Microservices Architecture)*

Tech Stack: React · TypeScript · Vite · Tailwind CSS · Java · Spring Boot · Spring Cloud Gateway · MySQL · Docker & Docker Compose

GitHub: <https://github.com/taufikr23/akademik>

- Built a full-stack academic information system on a microservices architecture, split across 7+ independent Spring Boot services (Auth, Student, Academic, Schedule, Attendance, Assignment, Grade).
- Designed a centralized API Gateway to manage client-side routing, and implemented JWT-based authentication with email notifications over SMTP.
- Built an interactive, type-safe, responsive frontend with React, TypeScript, Vite and Tailwind CSS, giving students, teachers and admins access to their respective data.
- Designed the relational database in MySQL and containerized the entire stack (database, backend, frontend) with Docker and Docker Compose for consistent, scalable deployment.

QuizSep — *Interactive Educational Quiz Platform*

Tech Stack: React · Vite · JavaScript (ES6+) · Modern CSS · Git & GitHub — deployed live on Vercel

GitHub: <https://github.com/taufikr23/QuizSep>

- Built a space/galaxy-themed interactive quiz platform with a User Panel (category selection, quiz taking, answer review, progress tracking) and an Admin Panel (question management, user management, analytics reporting).
- Implemented a full quiz system with 50+ questions across 8 categories (Math, Physics, Chemistry, etc.), tiered difficulty levels, a 5-minute timer, and real-time scoring.
- Built user statistics to track quiz history and score progression, plus an answer-review feature with per-question explanations and mistake analysis.
- Developed an admin dashboard with question management (CRUD + category/difficulty filters), user management (password reset, account deletion), and platform activity reporting.

T-Medic — *Integrated Digital Healthcare Platform*

Tech Stack: React · Vite · JavaScript (ES6+) · Tailwind CSS · Node.js · Express.js · Supabase (PostgreSQL) · Git & GitHub — deployed on Vercel & Railway

GitHub: <https://github.com/taufikr23/T-Medic>

- Built a full-stack digital healthcare application connecting patients, doctors and admins on one platform, with authentication, RBAC authorization, and cloud deployment.
- Built real-time online consultation, e-prescription, e-pharmacy, a payment system, and digital medical records using React, Express.js and Supabase Realtime.
- Designed a PostgreSQL database with 7 relational tables, a RESTful API, pagination, filtering and search, plus email notifications and verification via Brevo SMTP.
- Built an admin dashboard for doctor/medicine/user CRUD, payment verification, doctor-application approval, and analytics/activity monitoring.

ADDITIONAL PROJECTS

Bioskop — CLI Film Streaming Simulation — C · Windows Console API · ANSI Truecolor · File-based Storage

Github: https://github.com/taufikr23/UAS_TAUFIK_RAHMAN_TANJUNG

Built a C-based CLI application simulating a film-streaming platform with authentication (login/register), balance management, and free vs. premium (VIP) movie playback. Implemented file-based text storage as a simple database for user accounts, with CRUD operations via string-delimiter parsing. Designed a custom interactive text UI (arrow-key menu navigation, box UI, truecolor scheme) using the Windows Console API for consistent rendering across terminals. Built input-validation modules (email, username, password, top-up amount) and separate display modules for the logo, loading animation and ASCII art, applying code modularization across files in C. Added balance top-up, paid vs. free movie access, and an admin dashboard to monitor registered customer data.

EXPERIENCE

Programming Training Instructor

Dec 2024 – Jun 2026

Beasiswa PUB

- Taught Algorithm Logic & Programming Language fundamentals (Sep 2025 – Feb 2026): problem solving, flowcharts, pseudocode, operators, conditionals (if-else, switch-case), loops, functions, and arrays.
- Taught MySQL Database fundamentals (Feb 2026 – Jun 2026): CRUD operations (SELECT, INSERT, UPDATE, DELETE), database normalization, table-relationship design, and SQL query implementation.
- Guided participants through hands-on programming practice and case studies to strengthen analytical and problem-solving skills.
- Provided evaluation and mentorship to participants throughout the training program.

Academic Intern

Sep 2025 – Sep 2026

Universitas Nasional PASIM Bandung

- Assisted with practicum sessions and academic activities in the computer lab.
- Supported students in using software tools and completing practicum assignments.
- Prepared activity documentation and assisted lecturers in facilitating the learning process.

HIMAMI — Informatics Management Student Association, Public Relations DivisionSep 2024 – Sep 2026

Universitas Nasional PASIM Bandung

- Built and maintained relationships and coordination with students, lecturers, and external parties to support organizational activities.
- Managed organizational communication across social media and internal/external channels.
- Collaborated with other divisions on event execution, activity promotion, and organizational publications.
- Created and published informational content on activities, work programs, and organizational announcements.

EDUCATION

D3 in Informatics Management (Associate Degree)

Sep 2024 – Sep 2026

Universitas Nasional PASIM Bandung

- GPA 3.62 / 4.00
- Recipient of the Sustainable Community Empowerment (PUB) Scholarship
- 2-Year Accelerated Program

CERTIFICATIONS & TRAINING

Programming Training — PUB (Pemberdayaan Umat Berkelanjutan)

Algorithm Logic & C Programming

Sep 2024–Jan 2025

• Data Structures & Databases

Jan–Jun 2025

• Web Development: HTML, CSS, JavaScript

Jun–Aug 2025

• React Fundamentals

Aug 2025–Jan 2026

• Git & GitHub

Jan–Feb 2026

• Advanced React

Feb–Jul 2026

• Java Fundamentals

Jul 2026–Sep 2026
